 Toronto, ON
 647-472-7221
 jjkanu20@gmail.com
   

SKILLS

C#	WPF	ReactJS	Python	PostgreSQL	Redis	HTML/CSS
.NET	Blazor	AngularJS	Django	MySQL	MongoDb	Git

WORK EXPERIENCE

Junior Software Engineer – Metric Masters Ltd.

July 2021 – Present

Development of fleet-management and asset tracking software system for waste businesses.

- Responsible for all changes to existing Python ETL process and data analyzer, including bug fixes, refactoring, integrating Redis connection, and implementing new features.
- Partnered with Senior engineer to create a diagnostics website monitoring transmission of data from tablet devices, creating data visualization for system health analysis.
- Redesigned entire WPF client desktop application: updated UI, added new features, and implemented new controls to improve navigation and reduce user clicks.
- Partnered with Senior Engineer to improve performance by reducing database accesses and modifying system architecture to become more scalable. Increased autonomy of client devices by migrating server responsibilities, reducing CPU load of server up to 50%.

PROJECT EXPERIENCE

Palyglot – CSC301 Final Project (MongoDb, Express, React, Node.js)

Oct – Dec 2020

Working with a group, created a Pen Pal website to chat and improve literacy in a foreign language.

MultiCard.js – CSC309 Project (JS, HTML, CSS)

Feb – April 2021

Created a JavaScript library that constructs customizable nested card components.

EDUCATION

University of Toronto, Honours Bachelor's of Science
